

GLOBAL JET

GLOBAL JET'S LATEST FLEET ADDITION FOR CHARTER - A BRAND NEW 2021 BOMBARDIER GLOBAL 7500

A brand new 2021 Bombardier Global 7500 joined the Global Jet fleet and is available for charter. Global Jet is one of the fewest operators to manage a Global 7500. This is another milestone for them since there are very few Global 7500 in the market who are available for charter. The aircraft can welcome up to 15 passengers in ultimate comfort.

This one-of-a-kind private jet based in Europe offers the farthest and fastest flight in business aviation. With a range of 7700 nautical miles and a speed of Mach 0.925, the Bombardier Global 7500 is the perfect combination of speed, range, smooth ride, and short & long-field performance. Guests will be able to fly non-stop from Los Angeles to Dubai and feel refreshed thanks to Bombardier's Pür Air system; a sophisticated air purification that features an advanced HEPA filter that purifies and cleans the air.

Guests will not only be able to enjoy a low cabin altitude but also an exceptionally quiet cabin – 50dB. The aircraft is equipped with the latest technology engines – GE Passport, which will increase efficiency, reduce noise level, deliver more reliability, lower emissions, and reduce maintenance costs. It burns 470 lbs of fuel per hour less than the Global 6000.

This aircraft is designed in four cabin zones providing a maximum level of comfort thanks to Bombardier's latest seat design "The Nuage"¹. The forward cabin offers a club suite with four ergonomic executive seats followed by a unique six-seat meeting and dining area. The mid cabin offers an entertainment suite with a three-place divan opposite a large TV screen. The afterward cabin is arranged in a master suite bedroom where guests will be able to relax and enjoy a proper bed.

GLOBAL JET

This Global 7500 has a distinctive set of advantages and proposes new technologies such as applications to connect and control the entertainment system. Once the application is downloaded, clients can control the lighting, temperature, music, flatscreen TV and 3 monitors of the cabin. Moreover, they will also be able to enjoy a complete range of entertainment features thanks to Bluetooth and will be able to utilize the Ka Broadband high-speed internet system.

The Global 7500 stands out as well with its most spacious cockpit with the latest Bombardier Vision flight deck featuring advanced fly-by-wire technology. It has been developed in a way to increase security, space, and comfort.

This Global 7500 is the perfect fit to feel at home in the air.
