MONACO

THE ONLY VIP VIRTUALLY NEW BOEING 787-8 READY TO DELIVER TODAY  
IMMEDIATE RELEASE: 13 October 2021

VIP Commercial airline specialist Global Jet Monaco was recently appointed as the exclusive sales broker for one of world's most unique Boeing 787-8 Dreamliner's. The aircraft is designed to meet the requirements of heads of state, corporations, sports teams and private individuals, who want the ability to travel 7500NM non-stop with 80 passengers in supreme comfort.

The aircraft was manufactured in 2010, recertified & delivered by Boeing in October 2014 and entered into service January 2016 following completion. Both the interior and exterior are virtually new with only 1700 flying hours in total. "Configuration is one of the key elements of this aircraft" says Hardy Sohanpal of Global Jet Monaco. He goes on to add, "this is an exceptional opportunity for a specific market segment that needs the ability to move a group of people, without the current limitations of the commercial airline network".

There are 80 seats, which includes Business Class and above. The cabin is ingeniously divided into a Presidential office, Master bedroom, Master bathroom with shower, VIP lounge, a working group area, two large galleys, and overhead flight crew rest areas.

The aircraft is available for immediate sale in airworthy status and all visual inspections are encouraged since it has been maintained to highest manufacturer's standards. "Global Jet has considerable experience operating VIP commercial aircraft since we currently have 15 under full management and no doubt, these aircraft have high dispatch reliability rates", comments Bjorn Naberhuis VP of Business Development at Global Jet Monaco.
