

# GLOBAL JET

## GLOBAL JET'S IS PLEASED TO INTRODUCE A BRAND-NEW GULFSTREAM 650ER

An exclusive brand-new Gulfstream 650ER based in Geneva has just been added to our charter fleet. This aircraft reinforces Global Jet's major role in the charter market in Europe.

With this latest insertion, Global Jet is becoming one of the largest G650 and overall Gulfstream operator's in the world.

The Gulfstream 650ER is known for its high speed and long range but also for being one of the most comfortable and spacious cabin in the business aviation industry.

With a fourteen-seating capacity the interior cabin is divided in three large and refined living areas: the forward cabin contains four executive seats with two folding tables, a mid-cabin with a four-place conference group opposite a credenza and an afterward cabin containing two three-place divans.

Equipped with the latest technology and entertainment system (Netflix, Press Reader, Apple TV, iPads, etc...), passengers will have time to enjoy every minute of the journey and remain entertained during their long-haul flights.

The beige leather seats beautifully complement the wooden furniture of the cabin, and the two divans are the perfect match to experience an utmost comfort once converted into a bedding configuration.

During night flights, customers will enjoy being in a peaceful environment as the Gulfstream 650ER is known for being the quietest aircraft existing in the market.

On daytime, customers will appreciate the abundant natural light entering the cabin thanks to its sixteen oval windows.

Inside the cockpit, Gulfstream's latest aerodynamic technology allows the aircraft to associate speed, range, and efficiency.

An additional asset of this aircraft is the PlaneView™ II technology, which permits the pilots to increase safety while reducing workload.
